Subject: TDI Power Receives Air Agency Certificate from the FAA

Hackettstown, NJ – February 10, 2012

TDI Power recently received an Air Agency Certificate from the FAA. As part of TDI's ongoing initiatives in the in-flight entertainment market, we were required to apply for certification in order to repair the electronics provided to domestic commercial airlines. Over the course of the last eight months, TDI employees developed repair station, quality and training manuals that were audited by the FAA prior to certification.

TDI is currently in the process of applying for EASA certification which would enable us to repair the electronics provided to European airlines.

TDI Power is a global manufacturer of power conversion systems for the Military/Aerospace, Medical and Industrial markets. We have the broadest range of high technology power conversion products available in the marketplace, including DC and AC Power Systems, Power Supplies, Rectifiers, Converters and accessory equipment. Established in 1961, TDI is headquartered in New Jersey, has over 800 employees and three facilities located throughout the world. For more information about TDI go to www.tdipower.com.
